Focus on agriculture in eastern Germany – with *BAUERNZEITUNG*

For over 60 years, *BAUERNZEITUNG* has been a source of information for farmers in the eastern German states and, at the same time, part of their own history.

With its specialist articles on agricultural policy, animal husbandry and technology, this is an independent and practical companion.

A total of around 16 million hectares of farmland are cultivated in Germany. Of this, 5.3 million hectares are located in eastern Germany.

This corresponds to one third of the agricultural land in Germany.

In eastern Germany, a farm cultivates significantly more land on average than the national average.

Eastern Germany approx. 224 hectares per farm vs. national average approx. 65 hectares

This above-average size speaks for a high level of professionalism and capital strength.

Targeted reach:
BAUERNZEITUNG reaches medium-sized and large companies with high decision-making authority – maximum advertising impact with minimum scatter.

3 good reasons for the *BAUERNZEITUNG*

1. *BAUERNZEITUNG* reaches one third of the total agricultural area in Germany.

Source: MAAgrar2023

2. The average farm size in eastern Germany is 224 hectares, which is significantly larger than in western Germany (around 60 hectares).

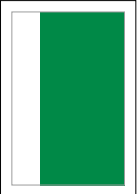

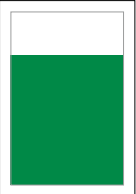

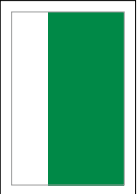

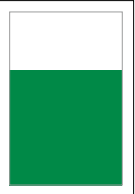

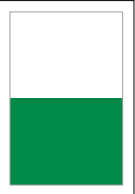

Source: DESTATIS, April 2024

3. In eastern Germany, there continues to be a strong trend towards mechanisation and rationalisation, combined with high investment per farm.
